Tom, I reviewed the proposed Consent for Access to Property with my clients and we can not agree to the current form without further clarification in the statement "Preparing for and conducting monitoring and sampling activity;". I believe that this is too broad for the authority to sample. If you can provide further limitation on this provision we will be able to resolve this matter.

Christopher T. Nowotarski

Service

Mr. Nowotarski:

Here's an effort to re-draft the consent to access in light of our exchange of calls and e-mails. Please let me know what you think.

Tom Krueger
